

MYSMT

**PAPERWORK, PERFORMANCE
AND PARTS — UNIFIED FOR
TOTAL CONTROL**

LOOKING OUT FOR YOU

As an SMT customer, you can quickly and easily access and manage all your administrative documents alongside fleet details, reporting, parts ordering, and repair and maintenance information related to your account.

In today's highly digitalised age, having quick and easy access to fleet information and documentation is an essential expectation of anyone responsible for maintaining a machine fleet.

HOW IT WORKS

The online webshop allows you to purchase parts whenever you need, making the process quicker and easier than ever before.

Recommendations are sent directly to you through MySMT to make you aware of any issues before they develop further, helping to maximise machine uptime.

PAPERWORK, PERFORMANCE AND PARTS

UNIFIED FOR TOTAL CONTROL

MySMT is an online portal for SMT Customers, providing them with 24/7 access to their company documents and fleet information.

With MySMT you can take the hassle out of keeping up to date with company documents as they are all stored in one place for you.

NOW ON YOUR MOBILE

MySMT now available remotely through the Mobile App, available on both Apple and Android devices.

Stay on top of your fleet's health and performance with real-time access to machine data. The MySMT app gives you remote access to essential services, such as fuel levels, fault codes and machine location, all from your mobile device.

BROWSE & BOOK WITH EASE

In the app, users can browse and order parts directly through the Parts web shop, view machine insights such as fuel consumption, productivity data, location and receive timely notifications for upcoming service intervals.

The app also allows users to book servicing or repairs quickly and easily, helping to minimise downtime and keep machines running smoothly.

STAY CONNECTED TO SMT

UNIFIED FOR TOTAL CONTROL

With direct access to skilled SMT engineers and support, the MySMT app connects you to servicing and repairs quickly and easily.

Plus, with timely notifications about upcoming services and other key events, you can stay ahead of your fleet's needs and maximise productivity, even ordering specific filter packages from the individual machine page to help maintain uptime.

THE THREE PARTS OF MYSMT

PAPERWORK, PERFORMANCE AND PARTS — UNIFIED FOR TOTAL CONTROL

Company Paperwork

Company Provides insight into all financial transactions with SMT, current contracts (CSA), access to oil sampling reports, ProCare recommendations and Service Inspection Reports.

Fleet Performance

Access to current fleet details including location, operating hours, fuel consumption, productivity data, CO2 emissions, visibility of repair and maintenance data on all machines.

Parts

Access the SMT online parts store to look up and order parts 24/7 on the basis of technical drawings.

OUR NEW MYSMT FEATURES IN DETAIL

INSPECTION CHECKLIST

Stay on top of your fleet’s health with real-time access to daily inspections.

The new Inspection Checklist feature in MySMT and in the MySMT App empowers site operators to quickly and easily report issues that could impact machine uptime.

Once an issue is submitted, fleet managers receive a detailed report, including images, allowing them to take timely action before a problem escalates.

All inspection activity is visible in MySMT via a user-friendly calendar view, providing clear oversight for effective machine monitoring.

With direct access to SMT support and genuine parts through MySMT, issues can be resolved promptly, helping to protect machine uptime and boost operational efficiency.

GROUP MACHINE REPORTS

Organise your fleet by machine type or site location.

MySMT makes it easy to interrogate data on your fleet by organising your machines into custom groups such as by machine type or site location.

This enhanced data and machine visibility empowers you to have greater control over your assets.

This allows you to gain real insights to reduce costs, emissions and achieve optimum fleet performance.

By grouping machines and generating site-specific reports, you can make more informed decisions.

TRAINING COURSES

Unlock the full potential of your machinery

Our tailored training courses for Operators and Fleet Management are now bookable through the training course page in MySMT.

SMT offers a range of training options tailored to different site roles, such as Operators and Fleet Managers, and targets, such as carbon reduction, increased productivity and optimised machine operation.

Our EcoOperator training is available per operator

or at a competitive day rate, helping improve fuel efficiency and reduce environmental impact.

For those looking to advance their operator skills further, we provide Advanced Operator Familiarisation and Operator Coaching, designed to boost confidence and performance on site. To support hands-on learning, we also offer Excavator and articulated hauler and wheel loader simulator hire, giving operators a safe and immersive training experience.
